## 2014 Best Tools for Schools

*Educators Highlight the Best Teaching Tools from the 2014 Winter NAMM Show*

The annual Winter NAMM Show in Anaheim California is the place where hundreds of thousands of musical instruments, accessories, and related products are debuted to industry insiders. For the fourth consecutive year, educators at the music products convention combed the exhibit halls

looking for the best products for classroom use in an array of different categories. Using an online voting process at sbomagazine.com and hard-copy ballots from attendees, music teachers made their selections, which culminated in a presentation of the 2014 Best Tools for Schools from the Winter NAMM Show.

Special thanks to panelists Dr. Karen Childress-Evans of the San Diego Unified School District, Jamie Knight of Huntington Beach High School's Academy of the Performing Arts, and SBO columnist Dr. John Kuzmich.

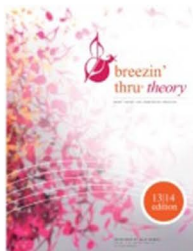

### Best Teaching Tool for Secondary Students

#### Breezin' Thru Theory, Breezin' Thru Composing

These dynamic web-based curricula for grades five-12 use a five-step learning process to teach music theory and composition.
